MICRODERMABRASION

Microdermabrasion successfully utilizes modern technology to reduce the appearance of fine lines and wrinkles, dark spots, blemished and thickened skin texture. Effective for both men and women alike, this treatment stimulates collagen, smooths fine lines and reduces enlarged pores and the appearance of scars. It may also be used to eliminate age spots and hyper pigmentation due to sun damage.

FRACTIONAL NON ABLATIVE RESURFACING

The Palomar fractional laser is the latest generation in skin resurfacing technology. The Palomar fractional laser smooths fine lines and wrinkles, improves skin discoloration, scarring, malasma, stretch marks, as well as offers mild skin tightening, but without the downtime or mild to moderate redness associated with other skin resurfacing technologies.

FDA-cleared

Bring your most beautiful skin to light.

STRETCH MARK TREATMENTS

Stretch marks from pregnancy or weight gain/loss result from the breakdown of collagen in the skin. The reversal of stretch marks is impossible, but it is possible to provide some appearance improvement by gently resurfacing the skin and stimulating new collagen formation.
