GETTER
Because your skin deserves results
as RADIANT as you are.

A Breakthrough in Skin Renewal

A glow that turns heads, radiance that lasts through every season, and renewal that turns back time—now, in one powerful treatment.

For years, patients turned to HALO® to tackle the most stubborn skin concerns, MOXI™ to keep skin radiant year-round, and Erbium to provide deep renewal unlike any other treatment. Now, for the first time, you can experience all three in a single appointment—one downtime, one unforgettable reveal.

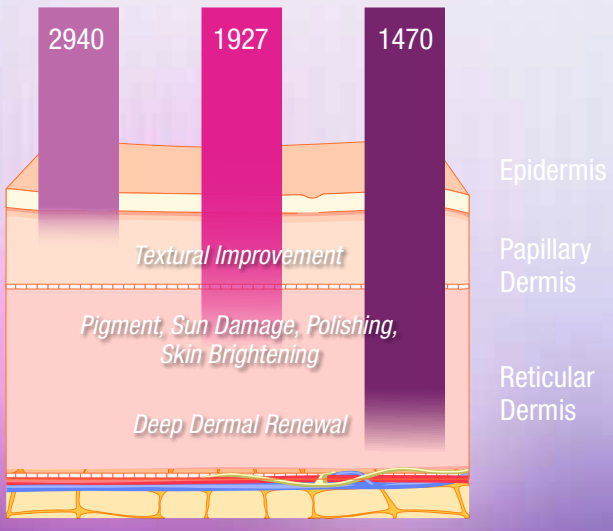
The Power of Three, Working Just For You

Behind every great result is smart science. HALO TRIBRID uses three wavelengths to renew key layers of your skin, from the surface to the deeper structures. Expect impressive results after just one session, with improvements that keep building over time.

Smooth & Renew (2940 nm)
Your texture refresher. This wavelength targets dull, damaged surface cells to reveal smoother texture, a healthier glow, and skin that feels irresistibly soft.

Brighten & Balance (1927 nm)
Your radiance boosting wavelength targets pigmentation and discoloration to help fade dark spots, sun damage, and uneven tone, leaving your skin brighter and more luminous.

Restore & Rebuild (1470 nm)
Penetrating deep into the dermis, this wavelength is ideal for non-ablative tissue coagulation and creating micro-thermal zones below the surface to renew and revitalize, with visible improvements that build over time.



Your Skin is Unique. Your Treatment Should Be Too

Your skin tells its own story—freckles from summers in the sun, lines etched by smiles and belly-aching laughter, or sunspots from too many afternoons outdoors. Whatever your story, HALO TRIBRID adapts to you. With customizable settings, your provider can tailor each session's depth, intensity, and focus to your unique needs.

That Means Whether You Want To …

- Smooth rough texture and soften acne scars
- Brighten dull or uneven tone
- Soften fine lines and wrinkles
- Reduce the look of enlarged pores
- Refresh skin impacted by sun, stress, and time

… HALO TRIBRID Can Meet You Where You Are in Your Skincare Journey

Want to smooth lines and wrinkles?
HALO TRIBRID can go deeper.

Looking for a gentle refresh?
HALO TRIBRID stays light.

Tackling more than one concern?
HALO TRIBRID treats them all at once.

Best of all, the treatment is suitable for every skin tone, from fair to pigment-rich, year-round. Your provider adjusts the settings so you get a treatment that's not just effective, but comfortable and uniquely yours.

What to Expect Before, During & After Treatment

To get the best results, your provider may suggest a few simple steps before treatment. Here are a few tips to consider as you prepare.

Pause active skincare. Stop using retinoids, retinols, glycolic acid, salicylic acid, and other strong exfoliants for about 1 week prior to treatment.

Avoid sun exposure. Stay out of direct sunlight and tanning beds for at least 2 weeks before your appointment and use broad-spectrum SPF 30+ daily.

Hold off on self-tanners. Skip self-tanning creams, sprays, or bronzers leading up to your treatment.

Keep skin calm. Avoid waxing, chemical peels, or other aggressive treatments in the area to be treated for one week prior.

Medications & health. Always let your provider know about any medications or skin changes before your appointment.

A Treatment Experience You Can Feel Good About

Your comfort matters as much as your results. Here's what you can expect during a treatment with HALO TRIBRID.

Before your session: Your treatment will require numbing cream, or your provider will discuss the best topical anesthetic to keep you comfortable.

During treatment: Integrated cooling technology helps ease the heat while protecting your skin.

Right after: Your skin will feel warm for the next hour or more, like a mild sunburn, gradually subsiding as your skin begins to renew.

Care tips: Use a gentle cleanser, keep skin moisturized, and protect with SPF 30+ daily. Avoid direct sun for at least a week. Your provider will share personalized aftercare instructions to guide your healing.

HEALING TIMELINE

Your results don't stop when you leave the office. Here's what to expect in the days after treatment.
