Your Face Shouldn't Be the Only Radiant Part of Your Skin.

Super MOXI® makes it easier than ever to bring the same healthy-looking, radiant appearance you love on your face to the rest of your body. From the neck and chest to the hands, arms, and back, it opens the door to a more complete approach to skin care.

Until now, treating larger areas of the body often meant longer appointments, making it harder to fit into an already busy schedule.

Super MOXI changes that.

Super MOXI builds on everything patients love about the award-winning MOXI laser, offering expanded treatment settings for a more personalized approach that's tailored to your skin goals, where you are in your skin health journey, and the downtime that works for your lifestyle.

From sun damage and brown spots to melasma-prone skin and uneven tone and texture, Super MOXI addresses a range of skin concerns. Keep your skin looking healthy and radiant from head to toe.

Why Patients LOVE Super MOXI

FOR ALL,
ANYTIME

COMFORTABLE
EXPERIENCE &
MINIMAL DOWNTIME

TARGETS

FACE & BODY
RESULTS

FASTER
APPOINTMENTS

Super MOXI was designed around what you want most: visible results, minimal downtime, and the flexibility to fit treatments into real life.

Glow

Beyond Your Face

FACE

- Tone
- Texture
- Dull or Tired-Looking Skin

It's time to show the rest of your skin some love.

Because confidence isn't just about how your face looks; it's about feeling good in sleeveless tops, at the beach, in photos, and in your everyday life.

Visible signs of sun exposure and aging can appear in more places than you might think. Super MOXI helps address them wherever they show up.

NECK

- Crepey-Looking Skin
- Visible Sun Damage

CHEST

- Discoloration
- Uneven Skin Tone

ARMS

- Uneven Tone
- Sun Damage

HANDS

- Early Visible Signs of Aging
- Sun Exposure

LEGS

- Rough or Uneven Texture
- Pigmentation
- Uneven Tone

BACK

- Sun Damage
- Texture
- Overall Skin Clarity and Radiance

Designed to Grow with Your Skin

Just as your lifestyle evolves over time, so do your skin's needs. Super MOXI can be personalized to support your skin at every stage of life. After all, the skincare priorities you have in your 20s may look very different from those you have in your 40s, 50s, and beyond.

Glow & Go

Light treatments focused on early prejuvenation and brighter-looking, refreshed skin.

Some patients want early prevention, others focus on maintenance, and some are looking to address skin-quality concerns. Super MOXI is designed to support the full range of treatment goals:

Clarify & Correct

Treatments designed to address visible sun damage and early signs of aging.

Many patients choose Super MOXI as part of an ongoing skincare routine because it can grow with their needs over time, including maintaining results after more intense, corrective treatments to support skin quality and keep their complexion looking its best year-round.

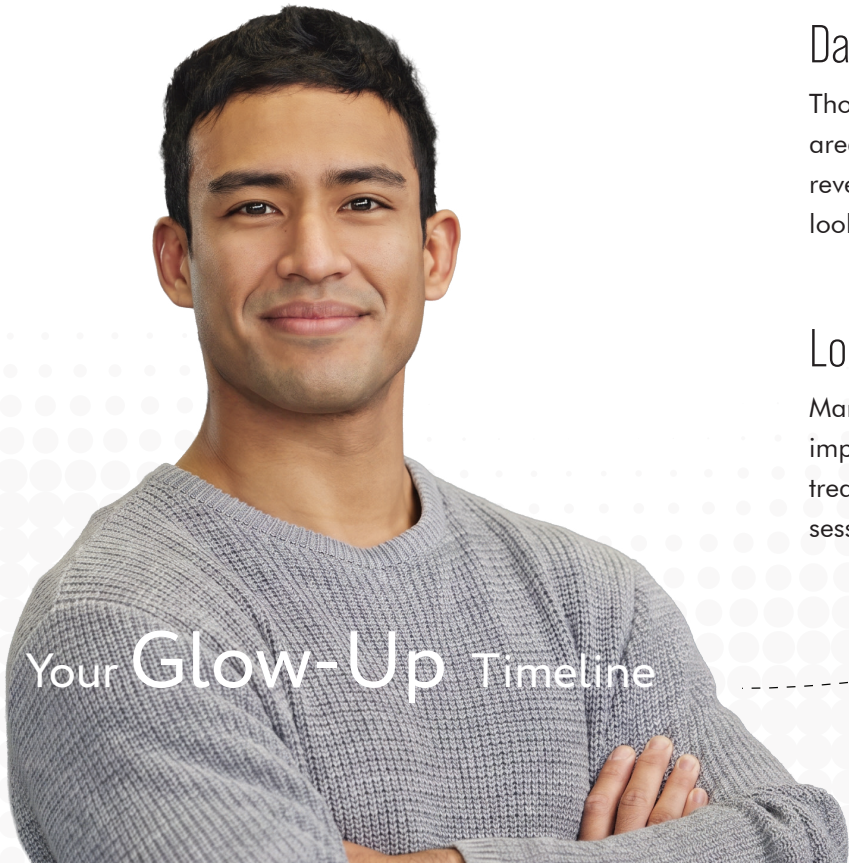

Revive & Renew

Higher-density treatments for more advanced skin revitalization and skin quality correction.

What you can expect throughout your experience:

WHAT TO EXPECT	WHAT IT MEANS FOR YOU
Treatment Time	Quick, efficient appointments designed to fit busy schedules
Comfort	Topical numbing to keep you comfortable
Downtime	Minimal downtime with simple post-treatment care
Makeup	Typically can be worn 48 hours after treatment
Results	Many patients notice visible improvement within 5–7 days
Recommended Plan	The treatment experience is customized to your needs, whether that means a single treatment, a series, or annual maintenance to help preserve your results
Treatment Areas	The face, neck, chest, scalp, arms, back, and legs

Treatment Day

Your provider performs a quick, comfortable treatment customized to your skin goals.

Days 1-2

Skin may appear pink and feel warm, similar to a mild sunburn.

Days 3-5

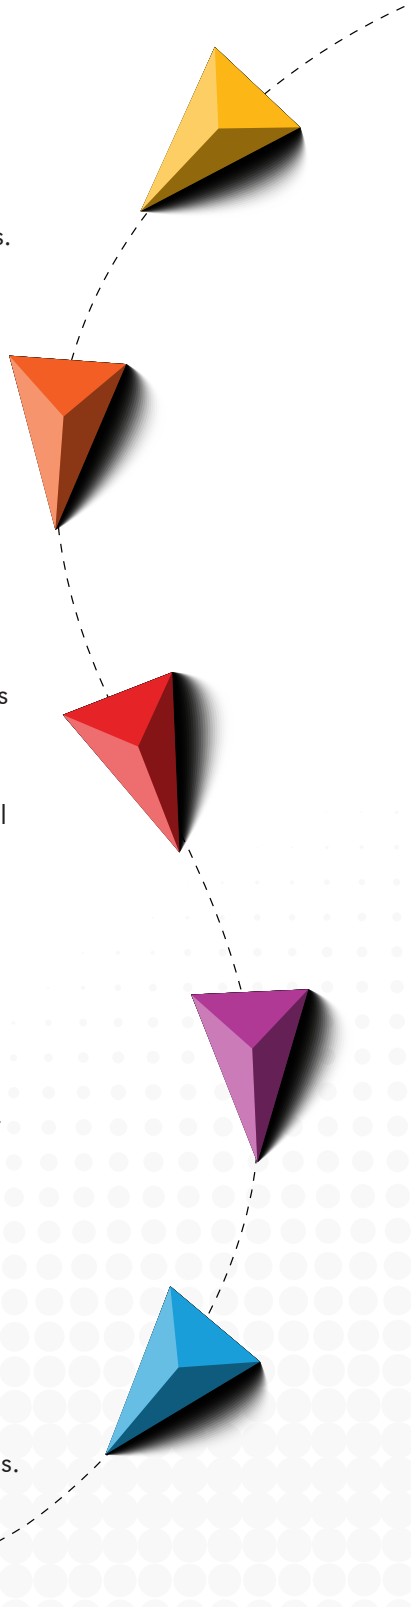

Tiny dark spots called MENDs (Microscopic Epidermal Necrotic Debris) will appear as your skin begins its natural renewal process.

Days 5-7

Those rough, darkened areas begin to slough away, revealing brighter, smoother-looking skin beneath.

Long-Term Results

Many patients see continued improvement with a series of treatments and maintenance sessions tailored to their goals.

Your Skin, Supercharged

Discover visible improvements in skin quality, tone, and texture with a treatment designed around your unique skin goals.
