HAIR • KERATIN + SMOOTHING

Softness that lasts.

Treatments for softness, shine and less frizz.

KERATIN SMOOTHING

Smoother, more manageable hair.

Keratin smoothing is a professional treatment that reduces frizz, softens texture and improves shine. Keratin is a protein naturally found in hair. The treatment uses a specialized smoothing formula, typically applied in sections and processed with a blow-dryer and flat iron, to create a smoother, more manageable finish.

It can soften waves and curls and make everyday styling easier, without necessarily making hair completely straight.

SPECIALIZED NAIL CARE

Dry. Private. Focused.

The podo pedicure, now in Edmonton. **NEW**

Where a pedicure ends, this begins. Your feet, treated, not polished: worked dry with sterilized instruments so nothing is hidden, in a private room, and finished with SÜDA Care®. Ingrown and curled nails are corrected with the UniBrace System, a fine wire that gently lifts the nail as it grows, without surgery. Thickened nails, cracked heels and corns, cared for properly.

Specialized care is not a pedicure. It is a different appointment, run a different way.

01

Worked dry

No soak and no foot bath. Nails and skin are worked dry with sterilized instruments, so the surface stays visible throughout.

02

Private room

Your appointment is in a private treatment room, away from the open salon floor.

03

Focused on the condition

The time goes to the nail, the skin and what caused the problem. No polish, no finish work.

A TREATMENT, NOT A PEDICURE.

Focused care, where it matters.

Patented Vortex-Fusion®.

Two devices in our clinic.

More than a traditional facial. HydraFacial® uses patented Vortex-Fusion® technology to cleanse, exfoliate, extract and hydrate in one treatment. Controlled suction and targeted serums treat the skin more thoroughly and consistently than manual exfoliation and masks, with boosters chosen for dryness, congestion, uneven tone or signs of aging, and no downtime.

fy Glass Skin

90 minutes • \$275

Our most complete facial.

Glass Skin combines microdermabrasion, dermaplaning, and a medical-grade peel to refine texture, lift surface buildup, and bring fresh clarity to the skin. The treatment is finished with targeted professional skincare, selected in the room according to your skin’s needs that day. Thoughtfully layered rather than one-size-fits-all, it is ideal when you want a smoother, more even, luminous finish with a treatment plan tailored to you.

fy Luminous

90 minutes • \$199

Event-ready glow.

A glow treatment designed to refresh dull, tired-looking skin before an event or whenever your skin needs a visible reset. Dermaplaning smooths the surface and removes fine facial hair, followed by a glow-enhancing peel selected for your skin. Celluma® LED light therapy completes the treatment, leaving the complexion looking clearer, smoother, and more luminous. A beautiful option for skin that feels polished, hydrated, and ready for what is next.

ORIGINAL ARTICLE • PILOT STUDY

Rejuvenation of gene expression pattern of aged human skin by broadband light treatment: a pilot study

Chang AL, Bitter PH Jr, Qu K, Lin M, Rapicavoli NA, Chang HY
Stanford University School of Medicine

WHAT THEY MEASURED

Researchers compared the activity of thousands of genes in skin samples from older adults, before and after regular BBL® treatments, and against young skin.

WHAT CHANGED

After treatment, many age-related genes, including known regulators of longevity, shifted back toward the pattern seen in younger skin.

KEY FINDINGS

2,265

genes changed their activity as skin aged.

1,293

moved back toward a younger pattern after regular BBL®, about 57%.

WHAT IT MEANS FOR YOU

Regular BBL® does more than clear spots. It helps skin behave younger.

Summary by Forever Young of the published study. J Invest Dermatol 2013;133(2):394-402.

Two RF modes.

One personal treatment plan.

More advanced than standard microneedling. Sylfirm X® delivers radiofrequency heat through fine, non-insulated needles, so energy spreads evenly along the full length of each needle to rebuild collagen beneath the surface. Its pulsed mode is gentle enough for melasma and redness, which is why it is safe where most RF is not.

THE TECHNOLOGY

PULSED WAVE

Short pulses target abnormal vessels and pigment.
For melasma and redness.

CONTINUOUS WAVE

Steady heat in the deeper layer builds new collagen. For firmness, texture and scars.

THE NEEDLES

25 gold-plated, non-insulated needles deliver energy along their full length, not only at the tip.
